NIIT, India, 2008

Introduction to Oracle 9i - SQL
NIIT, India, 2008

Objective

A self-taught Web Developer based in San Francisco Bay Area with an MBA in Finance. I am passionate about turning abstract ideas and concepts into Dynamic and Responsive web applications.

Experience

Computer Science Instructor

YoungWonks | 09/2019 - Present | Pleasanton, CA

YoungWonks is an accredited coding school that teaches computer programming to kids and teens.

- **Scratch** - Teach core foundational computer science concepts of looping, sequencing and branching.
- **Python** - Teach concepts of data-types, variables, conditional operators, loops, lists, dictionaries and Reading/Writing to files.
- **Pygame** - Teach concepts to create applied shapes and game programming in Python

Web developer

Chingu Voyage | 06/2019 - 07/2019 | Remote

Chingu facilitates and launches collaborative coding cohorts. I was enrolled in cohort 9 and enjoyed building 'Chef Maker App' with my teammate.

- Designed and developed a Fully responsive Recipe App 'Chef Maker' with my teammate
- Fully responsive Using CSS Flexbox
- Consumed data from external Edamam API

Front-End Developer

eBay | 10/2017 - 12/2017 | San francisco, CA

eBay Inc. is a multinational e-commerce corporation that facilitates consumer-to consumer and business-to-consumer sales through its website.

- Created single page application using ReactJS and used react-router to interact between the pages. Worked with JavaScript (ES5/ES6), HTML5 and CSS3
- Used third party react components - react-storybook, react-google-autocomplete, react-circular-progressbar

Recent Projets

Weather Now | HTML, CSS, React

An app to get current weather conditions based on the city name. It consumes weather data from openWeatherMap API

Meme Generator | HTML, CSS, React

An app to create memes. It consumes image data from imgflip API

Chef Maker| HTML, CSS-SCSS, JavaScript

An app to search and add recipes. It consumes data from edamam API

Restaurant Reviews App| HTML, CSS-flexbox, JavaScript, Mapbox API

User can select Restaurants from a range of cuisines and neighborhoods. Upon selecting a specific restaurant user receives additional information about the restaurant.
